

Middle School Curriculum

At SCOTS PGC College, our Middle School Teaching and Learning programs are thoughtfully designed to support students as they transition from the Primary Years into Secondary School. This pivotal stage lays the foundation for future success, nurturing academic confidence, personal growth, and a lifelong love of learning.

While our Senior School curriculum allows students to follow personalised pathways through SCOTS MyWay to support their post-school aspirations, the MyWay philosophy in Middle School focuses on providing a broad, well-rounded education. We aim to spark curiosity, challenge thinking, and offer students opportunities to explore a wide range of disciplines—helping them discover their passions and strengths.

We believe learning should be active and engaging. Our Middle School curriculum is purposefully balanced between theoretical foundations and practical, hands-on experiences. We value experiential learning—where students learn by doing—as a critical element in developing deeper understanding, creative problem-solving, and resilience.

Guided by the Australian Curriculum, our programs encourage students to explore themselves, their communities, and the wider world through multiple perspectives and learning areas.

YEARS 6 - 8

CORE LEARNING AREAS

English

Mathematics

Science

Health and Physical Education

Humanities

- History
- Geography
